

ICS/CERT TRAINING WORKSHOP

FOR WISCONSIN TECHNICAL COLLEGE SYSTEM
ADMINISTRATORS, GRANT WRITERS AND TRAINERS

12:30pm – 3:30pm

Wednesday, November 12, 2008

Mid-State Technical College

(Specific campus to be determined)

The federal Department of Homeland Security has mandated that all first responders be in compliance with the National Incident Management System (NIMS) program and Incident Command System (ICS) structure. Through Egrants, the Wisconsin Office of Justice Assistance provides funding opportunities for Wisconsin Technical Colleges to provide NIMS/ICS classes to first responders, and Community Emergency Response Team (CERT) training to volunteers.

While not mandatory, attendance at this workshop is highly recommended for Technical College staff who write grants and coordinate NIMS/ICS classes and CERT trainings.

Topics to be covered:

- Understanding the federal NIMS/ICS requirements for Wisconsin's first responders
- How to make sure your program qualifies for grant-funded reimbursement.
- How to apply for funding, timelines and grant management requirements.
- How to use Egrants, OJA's online grant management system

REGISTRATION INFORMATION
IS FORTHCOMING
